INTRODUCTION

HODL ON!!! Before you start to read, I want you to know that you are awesome and that you just stepped into an amazing and life-changing adventure - Welcome to SITADEL!

A "Sitel" is a fortress that is deployed inside or near a city, to defend against external attacks and internal disruption. We bring you a new opportunity. The project is SITADEL. Its goal is to be the figurative defender for all people. SITADEL allows people to strengthen their investments whether small or large. This is done so by rewarding them for each transaction processed by the network.

The concept of Cryptocurrency has become very popular, but often it is not for the right reason. The amount of people left behind in this area of technology is quite significant. According to fool.com, 20% of adults have never heard about blockchain technology or decentralized finance. SITADEL was created to assist anyone who wants to begin their decentralized portfolio or diversify their current holdings without any discrimination. Whether you are a large contributor, a working-class individual, or even a student, all users are treated equally. (SITADEL, by the people for all the people).

Though trending, cryptocurrency can be a hassle to get started. Although people are aware of its potential, there are certain factors that make it a "pain in the you-know-what." Thanks to blockchain technology, we can offer full transparency of all transactions in a secure decentralized manner. SITADEL's mission is designed to be the most innovative, safe, and easy-to-use crypto token. SITADEL aims to accelerate the adoption of decentralized finance by giving anyone from anywhere the same economic opportunities while educating rural communities so that there will be no one left behind.

The initial version of this project will be used to generate liquidity for the main goal which is the SITADEL 2.0 Network. This network will be used to bridge the gap between domestic and international financial support. Loved ones and friends will be able to transact and liquidate their holdings seamlessly through physical SITADEL branches in the near future. The current project model is purely for early adopters to gain rewards and generate liquidity.

FEATURES

100% COMMUNITY DRIVEN

We are driven by the principle of transparency and also believe in the 100% inclusion and participation of the community. By the people for all people.

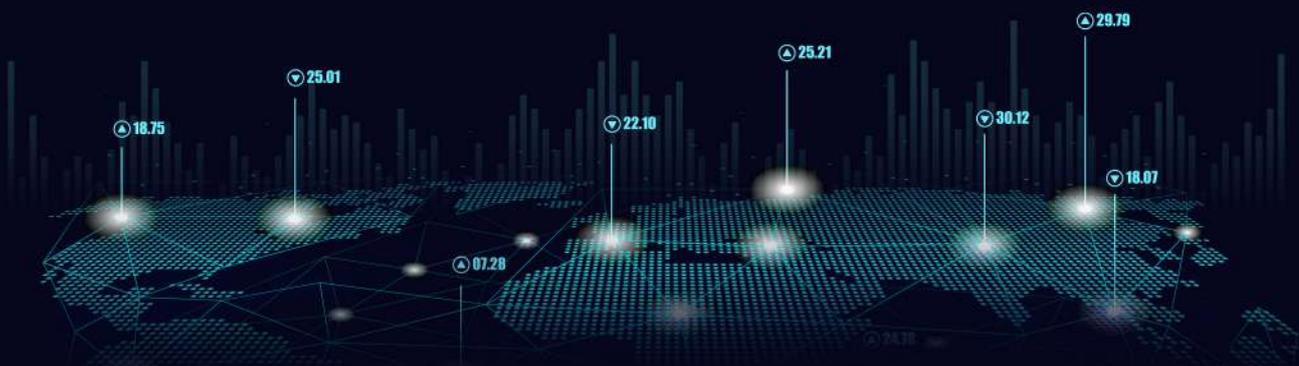

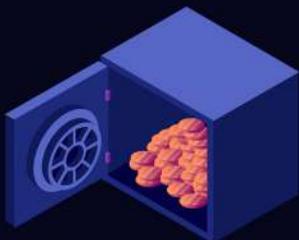

STATIC REWARDS

From each trade, there is a 10% fee whereas 5% gets distributed to previous holders. It is simple; the longer you hold, the more Sitadel you earn, even while asleep.

SITADEL ASSIST

The other 5% fee goes to the Liquidity Pool (LP) that stabilizes the token price floor, helps minorities in need, & sustains the dev team in order to achieve the milestones on Sitadel's roadmap.

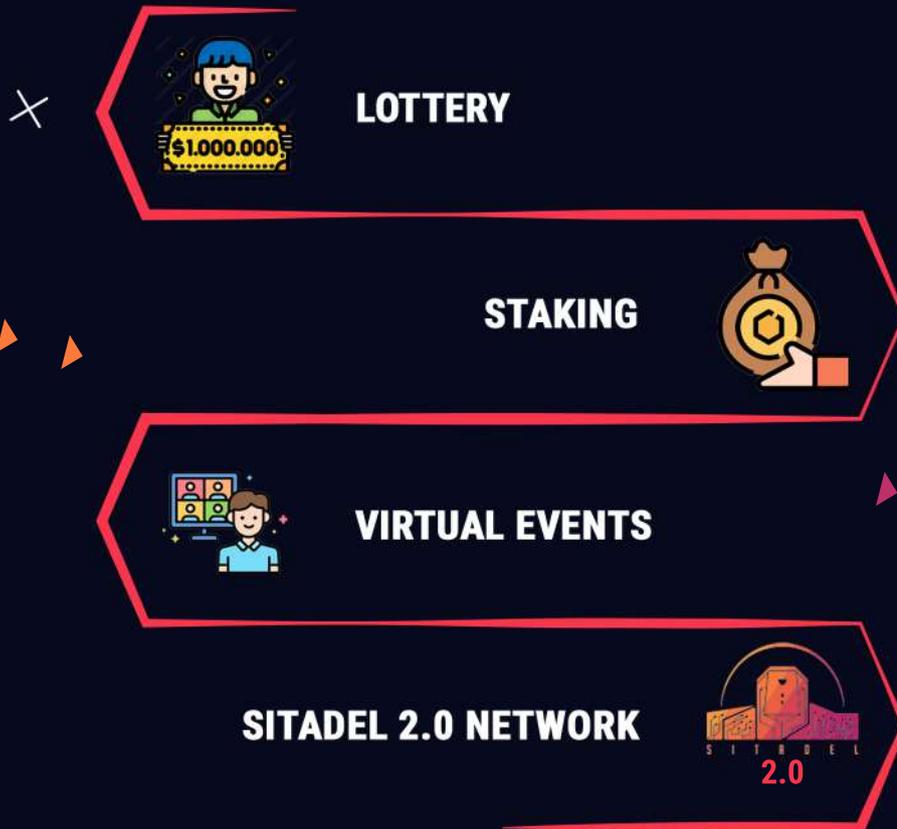

ROADMAP

The additional features presented are:

- An open-source contract so that all may see the protocols and possible actions by the SITADEL team.
- Sitadel has adopted a "Fair Launch" approach so no one is limited from participation whether it be whitelisting or contribution amount. Zero dev fund which leaves peace of mind to holders that there will be no drastic fluctuation due to "dumping".
- Last but not least is transparent ownership, the blockchain makes it visible for all to see the administrative addresses and keep track of all actions done by these addresses. No one will be left in the dark! We hope you join this community as we build the fortress for all. Thanks for stopping by!
